

RCS Engineering Pte Ltd is a Singapore based company established in 2001, and a subsidiary of Sim Lian Group specializes in engineering, design & installation for Data Centers, Offshore E & I, Commercial and Residential buildings.

We provide full turnkey solutions from feasibility studies, space planning, design, project management & execution, system integration, testing, commissioning and maintenance of data center M&E Infrastructure.

We are registered with Building Construction Authority (BCA) under the various top grade certifications.

Our Unique Value Proposition is "Industry Benchmark for Quality". Our clients value our competitive advantages. Our expertise & professionalism in construction ensures sustainable value added & good quality services that exceed customer expectations. These are reflected in our repeated involvements in major Data Centre players in Singapore. Director's hands-on involvement plus the experience of committed key personnel in project implementation, coupled with excellent vendor relationships for procurement and timely delivery of equipment product applications support are just some of the success factors.

We strive for continuous service and quality improvements by exposing our staff to market trends and technologies.

Safety is our priority. We value our workforce and ensure they are provided of a safe and productive workplace. The RCS Safety and Health Policy, Management System & Program are reviewed annually to ensure their relevance and effectiveness.

We are in a good position to expand into Regional Countries to capitalize on our expertise in Data Centre build, to meet the demand brought by the new wave of Digital Economy.
